Subject: HPO Vuong TRUONG Description of HPO/Patient placement-UOF Incident  
#17030418

On November 9, 2017, during his compelled interview, TRUONG diagramed his, [REDACTED] and staff's location during the aforementioned UOF incident. While compiling the investigative documents and/or exhibits for the investigative file, it was discovered that TRUONG'S diagram was unaccounted for and could not be located. This is a request that this memorandum, summarizing TRUONG'S depiction of staff and [REDACTED] location be used in place of the original diagram.

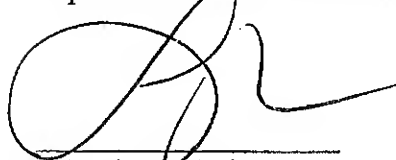

During the interview, TRUONG diagramed the Unit-T-13/T-14 courtyard, the courtyard's chain link fence, the west wall, the Unit T-13/T-14 entrance/exit door and the Gus O'Farrell Substation. When TRUONG arrived to the courtyard, [REDACTED] was at the courtyard gate. TRUONG marked [REDACTED] location with the letter "P" for patient at the gate. TRUONG also made several "X" marks in the center of the courtyard depiction to indicate where he recalled approximately 10 (ten) LOC staff standing while attempting to deescalate [REDACTED]. He noted that the staff were about 30-40 feet away from [REDACTED]. After [REDACTED] was told to move away from the gate, TRUONG indicated that [REDACTED] walked southwest, which was parallel to the west wall. TRUONG identified HPO Michael Hauscarriague with an "H" and stated that Hauscarriague was about 10 feet away from [REDACTED] when Hauscarriague made contact with [REDACTED]. TRUONG noted HPO Jose Becerra's location with a "B," and stated that Becerra was directly behind Hauscarriague prior to the contact. TRUONG stated that he was on Hauscarriague's left and still had [REDACTED] in his sight. He did not recall the positioning of HPOs
